## SUMMARY

A dedicated software engineer with over 2 years experience in building and maintaining web applications. Strong understanding of front-end and back-end technologies, with a passion for learning and implementing new tools and frameworks. Proven ability to collaborate with cross-functional teams to deliver high-quality and efficient solutions. Seeking to leverage my skills and knowledge to contribute to a fast-growing and innovative development environment.

## EXPERIENCE

### Frontend Engineer

#### To-Go Mobility

January 2024 - Present

- Lead, Developed and maintained frontend for an early stage startup, using react (HTML/ JSX), tailwind css and redux toolkit.
- Translated over 30 Figma screens into functional code, ensuring fidelity to design specifications.
- Ensured responsiveness across all devices, prioritizing mobile-first design.
- Collaborated with backend developers to Integrate RESTful APIs into the design to provide dynamic user experiences.
- Managed and deployed the app to Azure app service.

### AI UI Engineer

#### Freelance

March 2024 -June 2024

- Designed and Developed AI chatbot UI for client using React, Nextjs and Typescript.
- Ensured responsiveness across all devices, increasing number of users by 10%.
- Collaborated with backend developers to Integrate authentication and chat functionalities.
- Managed and deployed the UI to Vercel.

### Backend Developer

#### Medix AI

November 2023 - November 2023, Hackathon

- Contributed to the development of backend features, ensuring seamless communication between the frontend and AI components.
- Documented all API endpoints, encompassing both the authentication and AI endpoint.
- Team finished in the top 10% of the hackathon.

## PROJECTS

### CLI Chat Application

Tarminal-Chat-APP • [tarminal-chat-app.vercel.app/](https://tarminal-chat-app.vercel.app/) • May 2023 - December 2023

- Created a CLI chat application for real-time communication with chat room creation and membership management.
- Implemented authentication, token storage, and message sending features.
- Developed a React landing page, gaining over 350 downloads since launch.

### QR code Generation Discord Bot

QR-BOT • [github.com/HayatsCodes/QR-Bot](https://github.com/HayatsCodes/QR-Bot) • March 2023 - April 2023

- Built a Node.js Discord bot for real-time QR code generation from user inputs.
- Implemented QR code functionality using Node.js libraries, allowing users to customize colors.
- Deployed the bot's logic on Render.com, providing on-demand QR code generation with over 20 users using the bot.

### Book Library API

Gutenberg-fiction-books • [github.com/HayatsCodes/gutenberg-fiction-books-api](https://github.com/HayatsCodes/gutenberg-fiction-books-api) • February 2023 - March 2023

- Enabled access to 20,000+ fiction books from Project Gutenberg.
- Designed API architecture, database schema, routing, and middleware.
- Optimized database queries, implemented pagination, and deployed on Cyclic.sh.

## EDUCATION/CERTIFICATIONS

**Bachelor of Engineering in Computer Engineering - Federal University Of Technology, Minna - 2026**

**Full Stack Web Development Certificate - University Of Helsinki - 2023**

## SKILLS

- React, Redux, Tailwind, JavaScript, TypeScript, Next.js, Nodejs, Express, MongoDB, Python, Git/GitHub, Azure, Cyclic.sh, Cypress, react-testing, jest
- Strong problem-solving, Attention to detail,, Excellent verbal and written skills, Teamwork, Self-starter & Self-dependent
